Dental Hygiene

PHYSICAL AND COGNITIVE EXPECTATIONS
OF A STUDENT DENTAL HYGIENIST

Dental Hygiene (DH) is a practice discipline with cognitive, sensory, affective and psychomotor performance requirements. For the purposes of DH program compliance with the 1990 Americans with Disability Act, a qualified individual with a disability is one who with or without reasonable accommodation or modification, meets the eligibility requirements for participation in the DH program.

Admission to the DH program is not based on these standards. Rather, the standards should be used to assist each student in determining whether accommodations or modifications are necessary. Standards provide an objective measure upon which a student and the advisor base informed decisions regarding whether a student is “qualified” to meet the requirements. It is the responsibility of the applicant to read the technical standards carefully and to ask for clarification of any standard that is not understood.

If a student believes that he or she cannot meet one or more of the standards without accommodations or modifications, the dental faculty will determine on an individual basis, whether or not the necessary accommodations or modifications can be made in a reasonable manner. Both instructors and students must evaluate the standards continually throughout the program.

PHYSICAL AND EMOTIONAL STANDARDS

Dental Hygiene (DH) students should possess and be able to demonstrate the following:

1. **Critical Thinking:** critical thinking ability sufficient for clinical judgment. For example, student must be able to identify cause-effect relationships in clinical situation; collect and analyze clinical and radiographic data to aid in problem solving and participate in the development of dental treatment plans.

2. **Interpersonal Skills:** interpersonal abilities sufficient to interact with individuals, families, groups, etc., from a variety of social, emotional, cultural and intellectual backgrounds. For example, student shall establish rapport with clients/patients and dental team members.

3. **Communication Skills:** communication abilities sufficient for interaction with others in verbal and written form. For example, explain treatment procedures, initiate preventative oral health teaching, document and interpret treatment rendered and patient/client responses.

4. **Mobility:** physical abilities sufficient to move from room to room and maneuver in small spaces, stand and walk for extensive periods of time. For example, moving from room to room in a clinic and laboratory areas.
5. **Motor Skills:** gross and fine motor abilities sufficient to provide safe and effective care. For example, calibrate and use equipment, document care, position and move patients/clients, detection of calculus and other oral conditions and perform expanded function dental procedures as allowed by applicable laws.

6. **Hearing:** auditory ability sufficient to monitor and assess health needs and communicate with patients and other members of the oral health care team.

7. **Visual:** visual ability sufficient for observation and assessment necessary in dental care. For example, observe patient/client responses, observe tissue color and consistency and visually detect stains and deposits.

8. **Tactile:** tactile ability sufficient for assessment. For example, perform functions of dental examination and/or those related to treatment procedures.

9. **Weight-Bearing:** ability to lift and manipulate/move 45-50 pounds daily. For example, position patients/clients and move equipment.

10. **Cognitive Abilities:** ability to be oriented to time, place and person; organize responsibilities and decisions. For example, student shall assess client/patient complaints and oral conditions, provide patient care and implement appropriate treatment plans.

    **EXAMPLES ARE NOT ALL INCLUSIVE**
